PROFESSIONAL SUMMARY

Full-stack Developer with experience building web applications using JavaScript, TypeScript, Solidity, React, and Java, with a strong interest in blockchain-based systems. Developed IDChain, a decentralized civil registration dApp using Solidity, Hardhat, Ethers.js, React, and IPFS, focusing on smart contract workflows, role-based access control, and hybrid on-chain/off-chain data management.

WORK EXPERIENCE

Full-Stack Developer (Internship)

Sep 2023 — Feb 2024

PT. Dua Empat Tujuh, Yogyakarta, Indonesia

- Contributed to authentication, session management, and role-based access control for a project management dashboard using Java.
- Helped restrict dashboard access based on user roles and permissions to support secure internal application usage.

Website Administrator

Aug 2024 — Jul 2025

PT. Global Persada Realti, Yogyakarta, Indonesia

- Managed website content updates, issue monitoring, and basic maintenance to keep company information accurate and accessible.
- Coordinated website changes to support company communication and online presence.

EDUCATION

S1 Informatika

Sep 2020 — Apr 2026

Universitas Islam Indonesia, Yogyakarta, Indonesia

GPA: 3.86 / 4.00

Coursework: Teknologi Blockchain

SKILLS

Languages: TypeScript, JavaScript, Solidity, Java

Frontend: React, Astro, Tailwind CSS, HTML, CSS, Next.js

Blockchain & Tools: Solidity, Hardhat, Ethers.js, IPFS, Pinata, Git, GitHub, Vite, MetaMask, VS Code

Backend & Database: Node.js, PostgreSQL, Supabase

PROJECTS

IDChain

<https://github.com/ajraaa/idchain>

Decentralized civil registration dApp that explores blockchain, smart contracts, and IPFS for managing population administration workflows in a limited regional scope.

Tech: Solidity, Hardhat, Ethers.js, IPFS (Pinata), React

- Built a full-stack decentralized application using React, Solidity, Hardhat, Ethers.js, and IPFS.
- Designed a hybrid on-chain/off-chain architecture to store verification records on-chain while keeping sensitive documents encrypted via IPFS.
- Implemented role-based smart contract access and tested multi-stage workflows for submission, verification, approval, document issuance, status transitions, and events.

BTC DCA Tracker

<https://github.com/ajraaa/btc-dca-tracker>

Bitcoin dollar-cost averaging portfolio tracker with real-time P/L monitoring, authentication, transaction management, and interactive dashboard.

Tech: Next.js, TypeScript, Supabase, Tailwind CSS, CoinGecko API, Vercel

- Built a full-stack portfolio tracking app with Supabase Auth, transaction CRUD, data validation, and PostgreSQL-backed storage.
- Integrated CoinGecko API for real-time BTC price updates and developed dashboard visualizations for P/L, capital distribution, and accumulation points.

CERTIFICATIONS

Certificate of English Proficiency Test

Jun 2024 — Jun 2026

AWS Academy Graduate - Cloud Foundations

Mar 2023

LANGUAGES

Indonesian — Native

English — Professional Working Proficiency
